

Reflection on Assignment 3 – Visit to UTMDIGITAL and Virtual Talk

The online talk by UTMDIGITAL on 05/12/2023 was eye-opening! The speakers lead us to understand how UTM's websites are created and what makes their systems special. Learning about the behind-the-scenes work that goes into building and maintaining UTM's web presence was like peeking into a secret tech world. It was super interesting to discover the unique features that make UTM's systems stand out.

Then, on 19/12/2023, we got to visit UTMDIGITAL in person at UTM. The visit was great. We got a special access as a student to visit different departments, getting a close-up look at how they run things. The most interesting part is we got to step into the server room. Imagine being surrounded by all the machines and gadgets that make UTM's digital world go round. It was like being in a tech wonderland, and it gave us a real feel for the power behind the scenes.

Putting it all together, the online talk and the visit were a dynamic duo. The talk gave us the lowdown on UTM's websites and systems, while the visit let us see it all in action. It was like getting the full picture of how technology works in an educational setting. Plus, it hammered home the importance of having a strong digital backbone to keep everything running smoothly. These experiences not only boosted our tech knowledge but also made us appreciate the magic happening behind the screens at our own university.
