Reflection on ASSIGNMENT 1 – NALI 2023

Going to NALI 2023 was super cool! It was all about fancy tech stuff at UTM. We got to see new gadgets and learn about how technology is changing. The best part was checking out booths that teach in fun ways, like games and virtual reality.

Our group had interviewed the PROBASED, EXPERIENTIAL LEARNING THROUGH GAMIFICATION, UTM ECO Mobile App: Biodiversity Geo-tagged Ecotourism on UTM Campus, Mini Industry NXTPRIME: Burger Factory, and Archvision VR booths. They showed us cool ways to learn and teach using technology.

However, there was a little problem. The music in the hall was super loud, especially when we were doing our interviews. It made it hard for us to talk and hear properly. I think they should turn down the stage music a bit so everyone can have better conversations.

In conclusion, NALI 2023 was awesome! It got us all excited about using cool tech in our projects. We learned a lot and made some great connections. Can't wait to see what we can do with these ideas in the future!
